

NEXT AIRDROP

FLUX-ETH

Snapshot Date **5/15/2021**
±10% Paid To Flux Holders

FOLLOWING AIRDOPS

FLUX-BNB + FLUX-DOT

±10% Paid To Flux Holders

**Five Additional Airdrops
Through Q1, 2022**

What is Flux?

Flux is a cryptocurrency that powers a first-of-its-kind decentralized network of computational nodes capable of running decentralized, docker-deployed applications. Each collateralized node requires that the node operator provide computing power and service to the Flux network. The Flux network is the strongest, decentralized server network in the world.

How is Flux Different?

Unlike most other cryptocurrencies Flux runs on its own blockchain, was fairly distributed through GPU-only proof-of-work, and is capable of providing decentralized infrastructure to other blockchains and services. Flux has recently launched parallel assets, that enable Flux to operate on multiple blockchains including KDA, ETH, BNB, and DOT. These assets are distributed to holders, sequentially over the next year in non-compounding 10% increments.

The Future

Like AWS provides cloud computing, Flux will be the center of decentralized, and distributed cloud computing, globally. Capable of running unlimited services and applications.

Vision

The Flux Ecosystem is a suite of decentralized computing services and blockchain-as-a-service solutions together to offer an interoperable, decentralized AWS-like development environment. Flux utilizes a native POW coin to power this ecosystem, providing incentive for hardware hosters, governance on-chain, and bad actor mitigation via staking requirements for running hardware. The Flux operating system runs on top of Linux to provide the network with verified, enterprise-grade compute power and utilizes the blockchain to ensure transparency in governance operations. Flux node operators can choose from 3 tiers of hardware requirements to stand up after providing the necessary Flux capital soft-locked in their wallet. This allows almost anyone to be rewarded for providing hardware to the network, from anywhere in the world.

Asset

The native POW coin, Flux, has a finite maximum supply and is distributed via mining to both the miners and node operators in a symbiotic relationship. To increase visibility and portability of the Flux asset, the team is creating cross-protocol assets to allow Flux holders the choice of token types to exchange. In H1 2021, Flux will also be available on Ethereum, Kadena, Binance Smart Chain, and Tron protocols alongside the native Flux chain. Flux will add support for more protocols as they become viable, creating a governance digital asset that can traverse the entire crypto space and take advantage of current and future Defi services.

The First Decentralized Dapp-Server Network

Flux nodes currently host blockchain-focused projects such as:
Hosting backend services for Zelcore, a multi-asset digital custody platform
Kadena and Kadenaswap infrastructure (additional rewards paid in KDA to node ops)
Dibifetch, a market-rate aggregator and API data source
Folding@Home, using dormant processing power to cure diseases
Local applications including file-storage.

Additional soon to launch dapp applications include:
The worlds first decentralized website hosting system.
Host files in a decentralized network (think Storj, Filecoin, etc...).

Expanding dapp offerings, including services like secure data storage, hosting next-generation blockchain applications and infrastructure, and powering core components of Defi protocols. As more Dapps are hosted on the network, Flux achieves simple scalability by halving the Flux staking requirements for node operators, effectively doubling the computing power of the network with each collateral halving. Demand for the asset rises with network adoption, as node ops will have a say in network growth and the rewards become more valuable as the price of Flux increases and traded on multiple protocols, explained below.

Cumulus
10,000 FLUX

- 2 vCore
- 4GB RAM
- 50GB HDD/SSD
- 2.5TB Bandwidth

VPS and Raspberry pi 4 compatible

Nimbus
25,000 FLUX

- 4 vCore
- 8GB RAM
- 150GB SSD
- 4TB Bandwidth

VPS and Raspberry pi 4 compatible

Stratus
100,000 FLUX

- 8 vCore
- 32GB RAM
- 600GB SSD
- 6TB Bandwidth

VPS compatible

The above requirements are the minimum that a node provider must have to overcome the benchmarking system. If a node owner provides more resources than the above, the network will use all the resources that can be found on the specific server.

*The only blockchain that powers
scalable, DECENTRALIZED DAPP
infrastructure.*

- + 1,300+ Locked validator nodes
- + 300TB Server-grade SSD
- + 5564 vCores
- + 16TB RAM
- + 32% Locked supply
- + 4,200,000 API-Calls Monthly

Parallel Assets

Flux operates across multiple blockchains through 'parallel assets' that are interchangeable at a ratio of 1:1. Each parallel asset is snapshotted, then airdropped.

FLUX-KDA

FLUX-ETH

FLUX-BNB

FLUX-DOT

FLUX-???

Snapshot Date

April 8th, 2021

May 15th, 2021

TBD
Distribution Target Is Monthly

Airdropped To Holders

10%

±10%

±10% Each

Proof Of Work Distribution

STRATUS
1 Node receives 30% meaning 22.5 Flux per blockfind

NIMBUS
1 Node receives 12.5% meaning 9.375 Flux per blockfind

CUMULUS
1 Node receives 7.5% meaning 5.625 Flux per blockfind

POW
Miners receives 50% of the 75 Flux blockfind for securing the Flux chain

Growing Infrastructure Ecosystem

Rosetta

Flux Integrates with Rosetta, a Coinbase-led Open Source Project

CoinMetro

The Flux-CoinMetro partnership will allow users to participate in the Flux Ecosystem.

Kadena

The Kadena-Flux partnership offers FluxNodes owners the opportunity to run Kadena nodes and be rewarded in KDA coins.

ZELCORE

Zelcore is a multi-asset wallet that runs on Flux infrastructure. Zelcore is built to become an explorer for the cryptosphere, where you will satisfy all your needs in a single place.

FluxNodes Operator Rewards

Cumulus Rewards

per day
8.40 FLUX
1.50 USD

per week
58.82 FLUX
10.47 USD

per month
255.75 FLUX
45.52 USD

Profitability per month - Node Cost 4.70 USD
Node only: 40.82 USD

Nimbus Rewards

per day
13.37 FLUX ~ 2.38 USD
0.67 KDA ~ 0.71 USD
3.09 USD

per week
93.56 FLUX ~ 16.65 USD
4.67 KDA ~ 4.98 USD
21.64 USD

per month
406.83 FLUX ~ 72.41 USD
20.33 KDA ~ 21.67 USD
94.08 USD

Profitability per month - Node Cost 6 USD
Node only: 66.41 USD
With KDA: 88.08 USD

Stratus Rewards

per day
47.79 FLUX ~ 8.51 USD
2.67 KDA ~ 2.85 USD
11.35 USD

per week
334.51 FLUX ~ 59.54 USD
18.70 KDA ~ 19.94 USD
79.47 USD

per month
1,454.50 FLUX ~ 258.87 USD
81.30 KDA ~ 86.69 USD
345.55 USD

Profitability per month - Node Cost 32 USD
Node only: 226.87 USD
With KDA: 327.45 USD

Rewards based on 04.27.2021 data sheet
